KANSAS DEPARTMENT OF AGRICULTURE Division of Water Resources

MEMORANDUM

TO: Files DATE: October 18, 2016

FROM: Leslie Ireland **RE:** Water Right, File No. 9,859

Application File No. 49,350

Sean Lambert has filed the application referred to above on March 23, 2015, for a permit to appropriate surface water at the rate of natural flows to be stored in a new reservoir, located in the Southwest Quarter of Section 2, in Township 5 South, Range 1 West, Cloud County, Kansas. The reservoir was reviewed and authorized by DWR Structures Program under File No. CCD 079. They determined it would be classified as a pit pond. The requested storage diversion is located on Elk Creek Trib 2, in the lower Republican River basin. The applicant is requesting to appropriate a total of 223.6 acre-feet of surface water storage per calendar year, and re-divert 223.6 acre-feet of the stored water for irrigation use at 700 gallons per minute. The proposed point of diversion is located on property originally owned by the Muriel A. Hardin and now shown to be held as Hardin Farm Partnership RLLP. The place of use is shown by the Cloud County Appraisers office to be owned by the Hardin Farm Partnership RLLP. The placed of use has historically been authorized under File No. 9,859 and only overlaps in place of use. An application for change in place of use under File No. 9,859 was received on April 17, 2016.

Water Right, File No. 9,859 authorizes the diversion of groundwater from two wells with a blanket quantity of 190 acre-feet at 1,280 gallons per minute for the irrigation of 138 acres. The current place of use is comprised of two pivots, a pack-man and a partial wiper. The base acres have been determined by David Means, ES, Stockton Field Office to be 128 acres. The proposed change in place of use is to increase the irrigated acres to 172 acres to be irrigated by a whiper and full pivot. The half pivot located in the Southwest Quarter of Section 2 and the full pivot located in the Northwest Quarter of Section 11, both in Township 5 South, Range 1 West, Cloud County. The water for the new acres has been requested under File No. 49,350.

The pit pond has a surface area of 1 acre and a depth of approximately 15 feet, was determined in the structure permitting process to have a capacity of 11 acre-feet. The new permit, File No. 49,350 for 223.6 acre-feet has a drainage area of 2,777 acre-feet, providing approximately 1,099 acre-feet of runoff in 1 out of every five (5) years at a 20% chance of precipitation. The limiting factor for the storage would be the requested quantity for the re-diversion as the maximum quantity that can be requested for storage. The requested quantity for direct use of 223.6 acre-feet when combined with the senior water right, File No. 9,859 will require the new permit to be limited to a combined total of 223.6 acre-feet of water to irrigate the proposed place of use of 172 acres. The additional limitation will maintain a reasonable quantity for irrigation, providing 1.3 acre-feet per acre. The 700 gallons per minute for the re-diverted quantity is reasonable for irrigation use.

The applicant provided the names and addresses of landowners within one-half (½) mile upstream and downstream of the property boundaries. These owners were contacted for their comments on the new appropriation. No comments were received. The nearby well owners were contacted about the proposed change in place of use under File No. 9,859. No comments were received.

The size, location and design of the pit pond will not cause water to back-up on property under a different ownership. The design of the pit pond and that there are no immediate down upstream permits indicates that the approval of the new permit would not impact any senior, permitted water rights.

Due to the design and location of the storage structure, it appears that there are times when the diversion would be more aptly operated as a direct diversion of the surface waters in the Lower Republican River Basin (LRRB). A notarized Minimum Desirable Streamflow (MDS) statement signed by Sean Lambert, the tenant farmer, was submitted on February 8, 2016. By completing the MDS statement, the operator and owner affirms acknowledgement that there could be times when the diversion of water may not be allowed under the new permit. File No. 49,350 will be subject to MDS conditions. The permit will have the additional condition: "That in order to implement the provisions of K.A.R. 5-3-11(d)(6), no water shall be diverted unless the written permission of the Chief Engineer, or an authorized representative of the Chief Engineer, is obtained each time the applicant desires to divert water. The approval of this permit is not an indication that surface water will be available from this source of supply, or that written permission will be granted to divert water." As the structure is an instream pit and not a dam, it will not be required to have a controlled outlet. The LRRB is currently open to new appropriations meeting the criteria required by K.A.R. 5-3-11(d)(6), and the approval of this application is consistent with similar applications requesting surface water from the Republican River. The direct diversion will be subject to the MDS restrictions per the Kansas Water Office administration of the gage at Clay Center.

The modifications to the channel and permitting of the pit pond have been reviewed and approved by DWR Structures Program and assigned permit No. CCD 0079.

An approved water flowmeter shall be installed on the secondary diversion works (pumpsite) for the new permit. The change approval will also require meters to be instilled. If any chemical or foreign substance is injected into the water pumped from the authorized diversions, a check valve will be required.

In an October 17, 2016 email, Kelly Stewart, Water Commissioner, Stockton Field Office, stated that he recommended approval of the new permit. He did request that the permit be issued with the condition that permission is required to be obtained prior to diversion, as there will be times when the creek will flow into the pit pond and be more like a standard surface water diversion.

The permitting of the new appropriation will allow approval of the application for change.

Based on the above discussion, that this area is open to new appropriations, the proposed appropriation of water appears reasonable, the structure is permitted under the DWR Water Structures Program, and there is no evidence that senior rights will be impacted, the change will not result in an increase in consumptive use, so it is recommended that the referenced new permit and change be approved.

FILE COPY

RE: Water Right, File No. 9,859

Dear Mr. Lambert:

Enclosed is the order executed by the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, approving the application for change under the above referenced file number.

Your attention is directed to the enclosures and to the terms, conditions, and limitations specified in the approval for change. A condition of the approval is that an acceptable water flowmeter must be installed on the diversion works authorized under the referenced file.

Since this order modifies the original document referred to above, it should be recorded with the Register of Deeds as other instruments affecting real estate.

Please be reminded that reports of water usage must be submitted to this office annually. Records indicating the amount of water used should be furnished to the Chief Engineer by March 1 following the end of the previous calendar year so that the continued use of water becomes a matter of record in this office. The owner, or his or her legally designated agent, is held responsible for submitting annual water use reports. Failure to file an accurate water use report is a violation of law which makes you subject to civil penalties.

If you have any questions, please contract Leslie Ireland, Environmental Scientist, at (785) 564-6633. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Change Applications Unit Supervisor

KANSAS DEPARTMENT OF AGRICULTURE Jackie McClaskey, Secretary of Agriculture

DIVISION OF WATER RESOURCESDavid W. Barfield, Chief Engineer

APPROVAL OF APPLICATION FOR CHANGE IN PLACE OF USE WATER RIGHT, FILE NO. 9,859

The Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, after due consideration of the written application of Muriel A. Hardin, 6791 Devon Drive, Middletown, Ohio 45044, received in the office of the Chief Engineer on April 17, 2015, for approval of a change in the location of the place of use under the certificate of appropriation issued pursuant to the permit to appropriate water for beneficial use, as modified and amended by the Order of the Chief Engineer dated June 25, 2002, approving the application to change the point of diversion, and by the Order of the Chief Engineer dated March 27, 2013, approving the application to change the place of use and Order to better describe the authorized point of diversion, finds that the change is reasonable and will not impair existing rights, and that the application should be and is hereby approved.

The effective date of the change shall be the date this order is executed by the Chief Engineer, after which the authorized location of the place of use shall be:

Soc	. T	iun l	Range		NE	≣1⁄4			NV	V1⁄4			sv	V¼	• • • • • •		SE	=1/4

2		5S	1W			_								32.00	26.00					58.0
11		5S	-1W	. Program				31.00	37.00	23.00	23.00									114.0

a total of 172 acres, in Township 5 South, Range 1 West, Cloud County, Kansas,

located substantially as shown on the topographic map accompanying the application to change the place of use.

All diversion works into which any type of chemical or other foreign substance will be injected into the water pumped from the diversion works shall be equipped with an in-line, automatic, quick-closing check valve capable of preventing pollution of the source of the water supply. The type of valve installed shall meet specifications adopted by the Chief Engineer and shall be maintained in an operating condition satisfactory to the Chief Engineer.

The water right owner shall properly install an acceptable water meter on the diversion works authorized under this water right, prior to the use of water, in strict accordance with the Kansas Administrative Regulations 5-1-4 through 5-1-12 adopted by the Chief Engineer. The water right owner shall notify the Chief Engineer when installation of the water meter has been completed. The water right owner shall maintain the water meter in an operating condition satisfactory to the Chief Engineer, at all times during diversion of water and shall maintain records from which the total quantity of water diverted may be determined. The water right owner shall also report the reading of said water meter and the total quantity of water diverted annually to the Chief Engineer. Such records shall be furnished to the Chief Engineer by March 1 following the end of each calendar year.

In all other respects, the Certificate of Appropriation issued pursuant to Approval of Application, File No. 9,859, for permit to appropriate water for beneficial use, is as stated and set forth in the Certificate of Appropriation dated May 24, 1972, as modified and amended by the aforementioned orders.

This Order shall become a final agency action, as defined by K.S.A. 77-607(b), without further notice to the parties, if a request for hearing or a petition for administrative review is not filed as set forth below.

Request for Hearing. According to K.A.R. 5-14-3(c), any party who desires a hearing must submit a request within 15 days after the date shown on the Certificate of Service attached to this Order. Filing a request for a hearing will give you the opportunity to submit additional facts for consideration, contest any findings made by the Chief Engineer or present any other information you believe should be considered in this matter. A timely-filed request for hearing will stay the deadline for requesting administrative review of this Order pending the outcome of the hearing.

Petition for Review. Any person aggrieved by this Summary Order may petition for administrative review, pursuant to K.S.A. 82a-708b(a) and K.S.A. 82a-1901(a). The petition must be filed within 30 days after the date shown on the Certificate of Service attached to this Order and must set forth the basis for the review, unless stayed by the timely filing of a request for hearing.

Any request for hearing or petition for administrative review shall be in writing and shall be submitted to the attention of: Chief Legal Counsel, Kansas Department of Agriculture, 1320 Research Park Drive, Manhattan, Kansas 66502, Fax: (785) 564 - 6777.

Ordered this 24th day of Catholic , 2016, at Topeka, Shawnee County, Kansas.

Any use of water that is not as authorized by the water right or permit to authorize water before the chief engineer approves this application is a violation of the Kansas Water Appropriation Act for which criminal or civil penalties may be assessed. Such violation is a class C misdemeanor, punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. K.S.A. 82a-728(b). Civil penalties shall be not less than \$100 nor more than \$1,000 per violation. In the case of a continuing violation, each day such violation continues may be deemed a separate violation. In addition to these penalties the water right may be modified or suspended. K.S.A. 82a-737, as amended.

The application must be signed by all owners of the place of use authorized under the water right and his or her spouse, if married. Please indicate if there is no spouse. If land is being purchased under contract, the seller must sign as landowner until such time as the contract is completed.

In the event that all applicants cannot appear before one notary public, they may as necessary sign separate copies of the application before any notary public conveniently available to them. All copies signed in this manner shall be considered to be valid parts of the application.

If the request is signed on behalf of any Owner by someone with legal authority to do so (for example, an agent, one who has power of attorney, or an executor, executrix, conservator), it will be necessary to attach proper documents showing such authority.

Subject: Recommendation for Permit, File No. 49350 & change approval File No. 9717-D1

Kelly,

I heard about your requested revisions and took another stab at this strange pit pond... and while this is considered a storage application,, but not... the memo and permit conditions for this to be like a direct diversion in the LRRB, because that is more like what it really is.... Please see the paragraph at the top of page 2 in the memo and conditions in paragraphs 15-18 in the permit.

Please let me know if you could recommend the revised conditions of this permit.

As always comments and concerns are welcome.

RE: Application for Change

Water Right, File No. 9,859

Dear Sir or Madam:

Effective July 1, 2016, Senate House Bill No. 337 approved by the legislature requires the Division of Water Resources to notify all water right owners within one-half mile of a water right that has submitted an application to the Chief Engineer to change the place of use or use made of water.

This is to provide notice to you that Muriel A. Hardin has filed an application for approval of the Chief Engineer, Division of Water Resources, Kansas Department of Agriculture, to change the place of use authorized for irrigation use under File No. 9,859. A copy of the map for the proposed change has been enclosed for your information. The complete application for change is available for your review on our website:

http://agriculture.ks.gov/divisions-programs/dwr/water-appropriation/notices

If you have any questions, please contact our office, my desk phone is (785) 564-6633. If you wish to discuss a specific file, please have the file numbers ready so that we may help you more efficiently.

Sincerely,

Leslie Ireland

RE: Water Right, File No. 9,859 Application for Change

Dear Ms. Goff:

Returned herewith is our corrected/completed Application for Approval to Change an existing water right. My mother Muriel A. Hardin has signed the signature page that was sent to us in your correspondence dated March 24, 2015. As instructed, we have also included a \$200 check to cover the application to change the place of use.

We have returned all of the pages sent by you on March 24, 2015, along with the items discussed in the paragraph above. Should have any questions or concerns, please feel free to contact me at 614-332-8452.

Sincerely,

RE: Water Right, File No. 9,859 Application for Change

KS DEPT OF AGRICULTURE

Dear Mr. Hardin:

Returned herewith is your Application for Approval to Change an existing water right, which was received in this office on March 23, 2015. The application is not acceptable for filing in its present form.

It is required by K.A.R. 5-5-1(c) Filing an application for change, that the Division of Water Resources, is required to obtain a notarized signature from each landowner and their spouse, or a duly authorized agent. Records in this office indicate that the landowner of the place of use for File No. 9,859 is Muriel Hardin. If the property is held by a different party, please provide documentation to that effect in the form of a copy of the recorded deed. Please be reminded that all submitted signatures must be original and be notarized. Photocopies or fax signatures are not acceptable. A blank signature page has been included for your convenience.

In addition, it was noticed that the application was not accompanied by the statutorily required application fee. K.S.A 82a-708b states in part:

- "(b) Each application to change the place of use, the point of diversion or the use made of the water under this section shall be accompanied by the application fee set forth in the schedule below:
- (1) Application to change a point of diversion 300 feet or less.....\$100
- (2) Application to change a point of diversion more than 300 feet......\$200
- (3) Application to change the place of use.....\$200
- (4) Application to change the use made of the water.....\$300"

Based on your requested changes, an application fee of \$200 is required.

Upon return of an acceptable application, with the required information and filing fee, the application will be assigned a priority based on the date and time it is received in the office of the Chief Engineer. If you have any questions, please contact me at (785) 564-6631.

Sincerely,

Katie Goff

RE: File No. 9859

Dear Sir or Madam:

An application for approval of the Chief Engineer	⁻ to change the following condition or conditions of the file
number referred to above has been received:	
☐ place of use	PU
point of diversion	
use made of water	
As a matter of record, the Division of Water F	Resources has on hand a large number of applications
awaiting processing. Therefore to be fair to all concerned	d, and so that we can process those applications on hand
in the order they were received, we intend to concentrate	on the backlog of applications until the issue is resolved.

awaiting processing. Therefore to be fair to all concerned, and so that we can process those applications on hand in the order they were received, we intend to concentrate on the backlog of applications until the issue is resolved. You will be contacted regarding this application as soon as it has been examined.

In accordance with the provisions of the Kansas Water Appropriation Act, a portion of which is included below, the use of water prior to approval of the application is unlawful. You should not proceed and divert water as indicated by your plans in your application for a change for this file until you receive approval for this change from the Chief Engineer. Once approved, compliance with the terms, conditions and limitations of the permit is necessary. Conservation of the water resources of Kansas is required.

Section 82a-728 of the Kansas Water Appropriation Act, provides (a) except for the appropriation of water for the purpose of domestic use, . . . it shall be unlawful for any person to appropriate or threaten to appropriate water from any source without first applying for and obtaining a permit to appropriate water in accordance with the provisions of the Water Appropriation Act or for any person to violate any condition of a vested right, appropriation right or an approved application for a permit to appropriate water for beneficial use.

(b) (1) The violation of any provision of this section by any person is a class C misdemeanor...
A class C misdemeanor is punishable by a fine not to exceed \$500 and/or a term of confinement not to exceed one month in the county jail. Each day that the violation occurs constitutes a separate offense.

If you have any questions, please contact me at (785) 564-6645. If you wish to discuss a specific file, please have the file number ready so that we may help you more efficiently.

Sincerely,

Brent A Turney, L.G.
